Class III injectable medical devices.

> Complete Plurival® range: Injectables, Mesoline, Skincare

Combined therapies that bring together different ranges for complete anti-aging care with lasting results.

> Continuous training with Plurival® Academy

Uniting aesthetic specialists, so they can perfect their knowledge by sharing experiences and participating in dedicated courses provided by Plurival®.

> Expertise recognized in 70 countries

UNDERSTANDING SKIN AGING

> Due to factors such as age, hormone fluctuations in menopause, UV exposure and smoking, the skin's structure often suffers clearly visible changes:

▶ wrinkles

▶ drooping

▶ loss of elasticity

▶ dryness

▶ sensitivity

▶ thinning

One of the main causes of these changes is the progressive decrease in hyaluronic acid, a substance normally present in the skin and which plays an important role in keeping it hydrated. Young skin has the perfect balance, but reserves are depleted during the aging process.

Many of us would like to erase the effects of skin-aging in order to improve our facial appearance. Looking younger gives you a real sense of well-being... Why not start today?

WHY CHOOSE PLURIAL® INJECTABLES?

- > **Pluryal® Injectables is a range of fillers containing purified hyaluronic acid, to protect young skin and treat mature skin.**

By replenishing with hyaluronic acid, beauty is restored, with skin rehydrated and smoothed of wrinkles, youthful and radiant once more.

WHO CAN BENEFIT FROM PLURIAL® INJECTABLES?

- > **Everybody, of course!**

Forget clichés! Men are also entitled to want to look younger... meaning the Pluryal® range is aimed at both men and women.

WHY ARE PLURIAL® INJECTABLES A REASSURING CHOICE?

- > **These are high-quality products, manufactured with extreme care:**

→ the Pluryal® Injectables product range is manufactured **in accordance with European and international standards:**

- ▶ labelling/branding conforming to European standards;
- ▶ standards:
 - ISO 14644 (preparation of gel in cleanroom),
 - ISO 13485 (manufacturing process),
 - ISO 10933 (biocompatibility assessment).

- > **A safe choice for you:**

→ No-risk of dangerous side-effects.

- > **Very well tolerated:**

→ Injecting them is a comfortable procedure, for you and your practitioner.

→ Meeting your highest expectations:

- ▶ Effective:
 - Quickly visible, natural results.
- ▶ Long-lasting:
 - Results that are maintained over time.

WHAT CAN YOU EXPECT FROM PLURIAL® INJECTABLES?

- > **The Pluryal® range targets facial aging holistically:**

- Restoring the contours of the face,
- Remodelling facial volume,
- Plumping the lips.

- > **The results are natural, harmonious and long-lasting:**

- The procedure leaves no trace,
- The face is plumped while respecting its natural contours,
- The cosmetic results of just one Pluryal® Injectables treatment can still be seen after several months.

THOSE WHO'VE TRIED IT, LOVE IT!

Clinical tests prove significant results

- 3** > **Three months after the first treatment session**
 - Wrinkles were less deep, especially crow's feet and glabella lines;
 - Skin tone score was increased by nearly 75% on average;
 - The area covered with marionette lines was reduced;
 - A reduction in wrinkles was visible on photographs in 82% of cases;
 - The texture and radiance of skin in the periorbital region were improved by 25-50% when hyaluronic acid stabilised by glycerol was used.

- 5** > **Five months after the treatment**
 - The dermatological score for marionette lines and nasolabial folds was reduced.

- 6** > **At 6 months**
 - Glabella line depth was now remarkably reduced.

PLURIAL® INJECTABLES BY TARGET AREA

> **Pluryal® BOOSTER**
Rehydrating, revitalising and redensifying the skin

CLASSIC

> Pluryal® CLASSIC
Correcting wrinkles and remodelling the lips

VOLUME

> Pluryal® VOLUME
Restoring the facial shape

BOOST RESULTS WITH A COMBINED TREATMENT

› Combining Pluryal® Classic with Pluryal® Booster improves effectiveness:

- Pluryal® Classic offers intense, long-lasting hydration to spectacularly improve fine line appearance,
- Pluryal® Booster is less viscous and targets the superficial dermis.

› This combined treatment is carried out as follows:

- First phase: a treatment session using Pluryal® Classic,
- Second phase: 2 treatment sessions using Pluryal® Booster,
- The break between sessions is 21 days.

› This approach improves the effectiveness of the treatment:

Results are superior when combining products rather than using them separately :

- More than half of patients found an improvement in at least one of the features of their skin (texture, fine lines, radiance etc.),
- When comparing before and after photos, 62% of patients were surprised by the results, which went beyond their expectations.

A FEW WORDS FROM PRACTITIONERS

“I am working since 8 years with Pluryal® Injectables products. I am very satisfied because my patients are happy about the natural result obtained.”

Dr Hale KAPKIN, doctor in anti-aging medicine, specializing in skin revitalization in Berlin, Germany.

“Beauty is my science. I choose Pluryal® Injectables products because I take care of my patients.”

Dr Serge SCHMITZ, plastic surgeon, plastic, reconstructive and aesthetic surgery in Luxembourg, Luxembourg.

LEARN ALL ABOUT YOUR PLURYAL® INJECTABLES TREATMENT

› At a glance:

- **A Pluryal® Injectables treatment can be completely painless** thanks to lidocaine, a local anaesthetic contained in most of the products;
- **There is no allergic reaction** (none has been reported during any of the clinical trials carried out on the Pluryal® Injectables);
- **Instant cosmetic results;**
- **Still noticeable, 6 months on:**
 - ▶ Approximately 6 months for the lips,
 - ▶ Between 6 and 12 months for wrinkles and facial contour.
- **The treatment can be repeated.**

› Schedule:

- Day one:
 - ▶ Your practitioner injects the product using a very fine needle in order to fill in wrinkles or add volume to the face and contours of the lips.
 - ▶ The procedure lasts for between 15 and 30 minutes.
- Over the next 48 hours:
 - ▶ The after-effects of a Pluryal® treatment are minor and generally disappear within approximately 48 hours. They can include a feeling of discomfort, rashes, itching or sensitivity at the injection sites.
- Long term:
 - ▶ To maintain results, Pluryal® injections can be repeated every 6 months for lips and every 6 to 12 months for wrinkles or facial volumes.
